

How to create a mobile application without writing a single line of code?

Mario Fistanić

„be happy not mad, but use
Oracle BI MAD”

Oracle Bi Mobile App Designer

- tool for designing purposeful apps for mobile phones and tablets
- apps you created are platform and device independent
- apps are based on the modern HTML5 standard
- automatic rendering for differing screen sizes ensures visualizations display optimally with a write once, run anywhere model

Oracle BI Mobile App Designer

- Part of OBIEE 11.1.1.7.1 , included in BI Mobile licence

- Build on BI Publisher technology – easy to build ,
- adept, extend, customize

- Data source:
 - BI Subject Area
 - BI Publisher Data Model
 - Excel Spreadsheet

- Apps library

Oracle BI Mobile App Designer

- Very similar to BI Publisher Design Layout
- WYSIWYG Design Editor
- Drag and drop components
- Create pages and subpages
- Navigation
- Plug in
- SDK

Oracle BI Mobile App Designer

- Security
 - Use same security as OBIEE
 - No install needed on device
 - No data stored on device
 - Compatible with any mobile device
 - Works with desktop browsers

- let's build HEP Power Plants app

**Thank you for your
attention**
